disk control data area, and thus reproducing from the copied AV data 4 is made impossible.

COPYRIGHT: (C)1999,JPO

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a reproduction dedicated optical disk for disabling digital copying from a reproduction dedicated optical disk to a recording optical disk, and to provide a recording optical disk, an optical disk device and the method for preventing the copy of optical disk.

SOLUTION: AV data 4 scrambled by a specified key 1 is pre-pit recorded, a reproduction dedicated optical disk for pre-pit recording a scramble key 3 is provided in a control data area, and a recording optical disk for pre-pit recording information indicating the same is provided in the control data area of an address identical to that of the reproduction dedicated type. Even when the AV data 4 is copied from the reproduction dedicated optical disk to the recording optical disk in a scrambled state, the scramble key 3 of the control data area is inhibited from copying the data in the recording optical
